Diagnosis

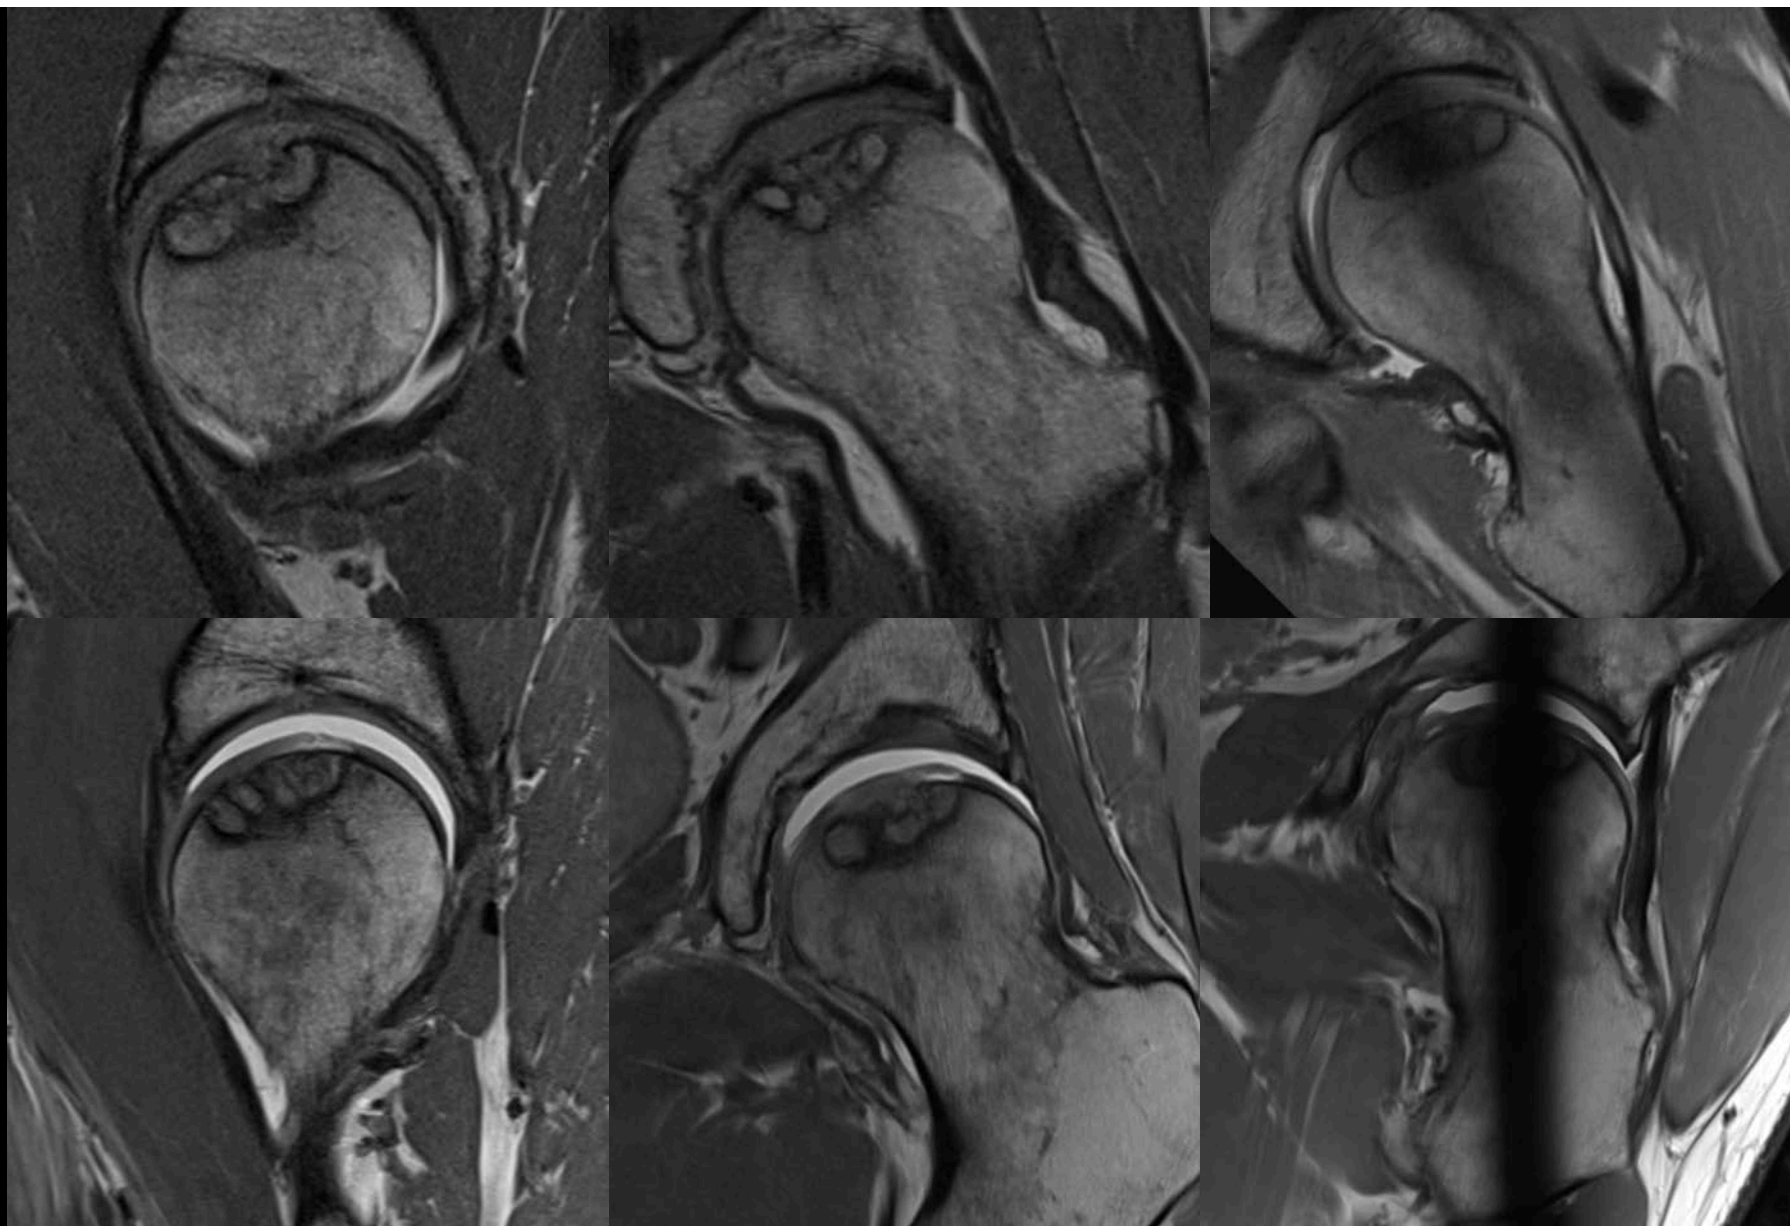

- > **Steroid induced focal avascular necrosis of the anteromedial femoral head**
 - ARCO Stage 2
- > **Anterior intraarticular impingement associated with cam-deformity and valgus deformity**

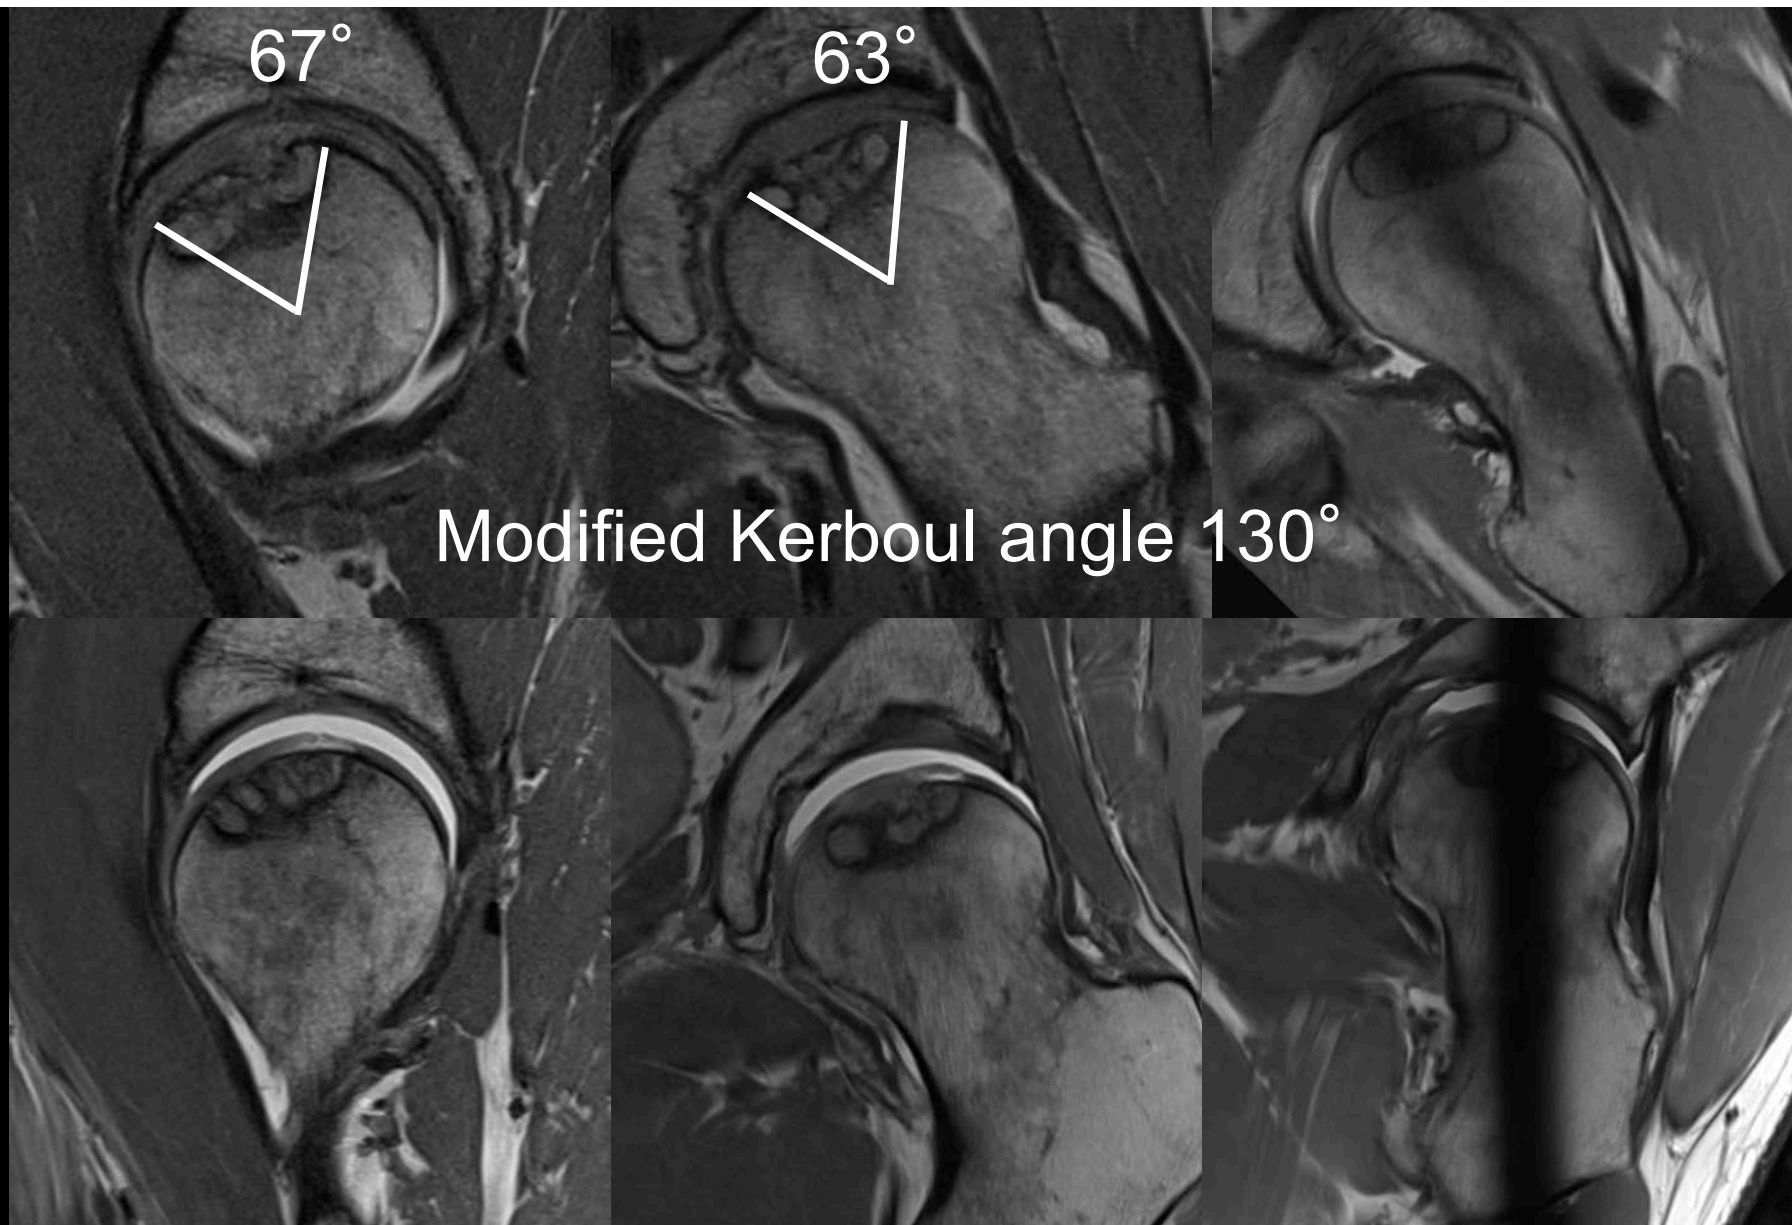

Aim of the Surgical Treatment

- > Revascularize the necrotic zone
- > Perform cartilage treatment
- > Address the anterior impingement
- > Rotate the necrotic area outside of the main weight bearing area
- > **Surgical hip dislocation**
- > **'Trap-door' procedure**
- > **Varus intertrochanteric osteotomy**

Varisation 15°
